

## Population

Communities included in the Bristol Bay region for determining population are those communities served by the Bristol Bay, Dillingham City, Lake and Peninsula Borough, and Southwest Region School Districts. Communities are as follows:

Aleknagik city	Naknek CDP
Chignik city	New Stuyahok city
Chignik Lagoon CDP	Newhalen city
Chignik Lake CDP	Nondalton city
Clark's Point city	Pedro Bay CDP
Dillingham city	Perryville CDP
Egegik city	Pilot Point city
Ekwok city	Pope-Vannoy Landing CDP
Igiugig CDP	Port Alsworth CDP
Iliamna CDP	Port Heiden city
Ivanof Bay CDP	Portage Creek CDP
King Salmon CDP	South Naknek CDP
Kokhanok CDP	Togiak city
Koliganek CDP	Twin Hills CDP
Levelock CDP	Ugashik CDP
Manokotak city	

*Note: CDP is the U.S. Census Bureau abbreviation for Census Designated Place.*

It is estimated that the population of the Bristol Bay region has decreased by 4.5 percent (-355 people) between Census 2000 and 2003. More than 60 percent of the Bristol Bay region's population were identified as Alaska Natives, alone or in combination with some other race, for Census 2000. The Alaska Native population is greater than that shown in the following table, but Census 2000 sampling and suppression of data for communities with small populations causes an undercount of the actual population.

30.9 percent of the Bristol Bay region's total population are of school age (5 to 19 years), but fully 36.5 percent of the region's Native population are of school age.

Table 54

Sources: U.S. Census Bureau and Alaska Department of Labor and Workforce Development.

Note: Total population includes Alaska Natives, alone or in combination with some other race. Age, gender, and ethnicity information is not available from the Department of Labor and Workforce Development's 2003 population estimates.

## School Inventory and Enrollment

Public school enrollment is the count of students enrolled on October 1, 2003 for the 2003-2004 school year. Therefore, students leaving or entering a school after October 1, 2003 are not reflected in the enrollment figure.

There are four school districts in the Bristol Bay area, with 29 public schools (including correspondence schools). Native enrollment for the school year 2003-2004 represented 88.2 percent of the total 1,838 enrollment. In the 2002-2003 school year, Alaska Native enrollment had made up 86.6 percent of a total enrollment of 1,976 students.

Alaska Native "students with disabilities" represented 92.9 percent (275 students) of all students enrolled with disabilities (296 students) in the Bristol Bay region.

There were no private schools in the Bristol Bay region that reported enrollments to the Department of Education and Early Development.

Notes: 1. For the 2002-2003 school year evaluation, Bristol Bay Middle/High School was the Bristol Bay High School.

2. This school was not included in the 2002-2003 school year education evaluation.

## Average Daily Attendance Rates

The Bristol Bay region schools had average daily attendance rates of 90.3 percent for the 2003-2004 school year. This represents a slight increase (+0.8 percent) over the 2002-2003 school year. The Alaska Department of Education and Early Development measures attendance rates by taking the sum of all days present for all students in a school for the year and dividing this by the sum of all days present and all days absent for all students in a school for the year. This information is not available by ethnicity.

Notes: N/A = Not Available.

\* Bristol Bay Middle/High School was named the Bristol Bay High School for the 2001-2002 and 2002-2003 school years.

## Teacher Ethnicity

There were 172 teachers (including teachers, head teachers, visiting teachers and remedial specialists) in the Bristol Bay region schools for the 2003-2004 school year. Twenty-three teachers were Alaska Natives, two more Alaska Native teachers than in the 2002-2003 school year.

Figure 28  
Bristol Bay Region  
Number and Percent of Teachers by Ethnicity  
2003 – 2004 School Year

Source: Alaska Department of Education and Early Development.

## Educator Turnover

For this report, “educator turnover” includes instances in which a superintendent, principal, or teacher changes his or her job classification within the same school (for instance, a teacher becomes a principal) and/or leaves the school where he or she worked from the 2002-2003 school year to the 2003-2004 school year.

The following table provides educator turnover rates, broken out by superintendents and principals combined and by teachers for the four school districts that are included in the Bristol Bay region. The category of teachers includes: teacher, head teacher, visiting teacher, and remedial specialist.

Superintendent/principal turnover in the Bristol Bay region was 70.4 percent, and teacher turnover was 27.3 percent.

## List of Schools Making AYP

Seventeen out of the 29 Bristol Bay region schools made adequate yearly progress in the 2003-2004 school year. Five of these 17 schools had not made adequate yearly progress in the 2002-2003 school year. Lake and Peninsula Correspondence School had three students in the 2003-2004 school year; and AYP results were not available for that school, as they may provide information about individual student performance.

The table below shows which schools in the Bristol Bay Region made adequate yearly progress for the 2003-2004 school year. This table also indicates whether the school had met AYP in the 2002-2003 school year.

*Table 58

## List of Schools Not Making AYP

The table below shows which 11 schools in the Bristol Bay region did not make adequate yearly progress for the school year 2003-2004. This table also indicates whether the school had met AYP in the 2002-2003 school year.

Two of these 11 schools had made adequate yearly progress in the 2002-2003 school year, and they all are at either Level 1, 2, 3 or 4 AYP sanctions. AYP Level Sanctions vary, depending on whether the school is receiving Title I funding. All of these 11 schools are Title I funded schools. See Appendix A for sanctions for schools receiving or not receiving Title I funds.

Kokhanok School in Kokhanok was a safe harbor school. Safe harbor is another way for a school to show it is making progress toward the statewide AYP goals. In general, safe harbor means a school can still make AYP, if it reduces the percent of students who score below proficient on exams by 10 percent from the previous year. For example, if a school is 70 percent not proficient, it would need to make a 7 percent improvement to be safe harbor.

Table 59

## Benchmark Examinations

School districts included in the Bristol Bay region are the Bristol Bay Borough Schools, Dillingham City Schools, Lake and Peninsula Borough Schools, and the Southwest Region Schools.

The table below shows the benchmark examination results for students enrolled in the third, sixth, and eighth grades. Alaska Native students have significantly lower test results for all grades and subjects than do students of all other ethnicities combined.

Figure 29  
Bristol Bay Region  
Benchmark Examination Results by Ethnicity, 2003 – 2004 School Year

Source: Alaska Department of Education and Early Development.

Comparisons of Bristol Bay region benchmark examination results between the 2002-2003 and 2003-2004 school years for Alaska Native student performance are found in the table below. The two school years may not be directly comparable because some data were withheld, if they might have revealed an individual student's performance. Other variables may include opening and closing of schools within regions and varying student populations for Grades 3, 6, and 8.

Table 60

## High School Graduation Qualifying Examinations

Students are required to pass the Alaska High School Graduation Qualifying Examination in order to receive high school diplomas. Students can begin taking the exam in their sophomore years and are eligible to retake the exam as juniors and seniors for any un-passed portions of the test. Students are offered retests in both the spring and fall of their junior and senior years. Those who do not pass the High School Graduation Qualifying Examination will be denied diplomas and will receive Certificates of Achievement instead.

In the Bristol Bay region, significantly lower percentages of Alaska Native students were proficient in the subject areas tested, when compared to all other students.

Figure 30  
Bristol Bay Region  
High School Graduation Qualifying Exam Proficiency Results  
for Grade 10 Test-takers, by Ethnicity  
2003 – 2004 School Year

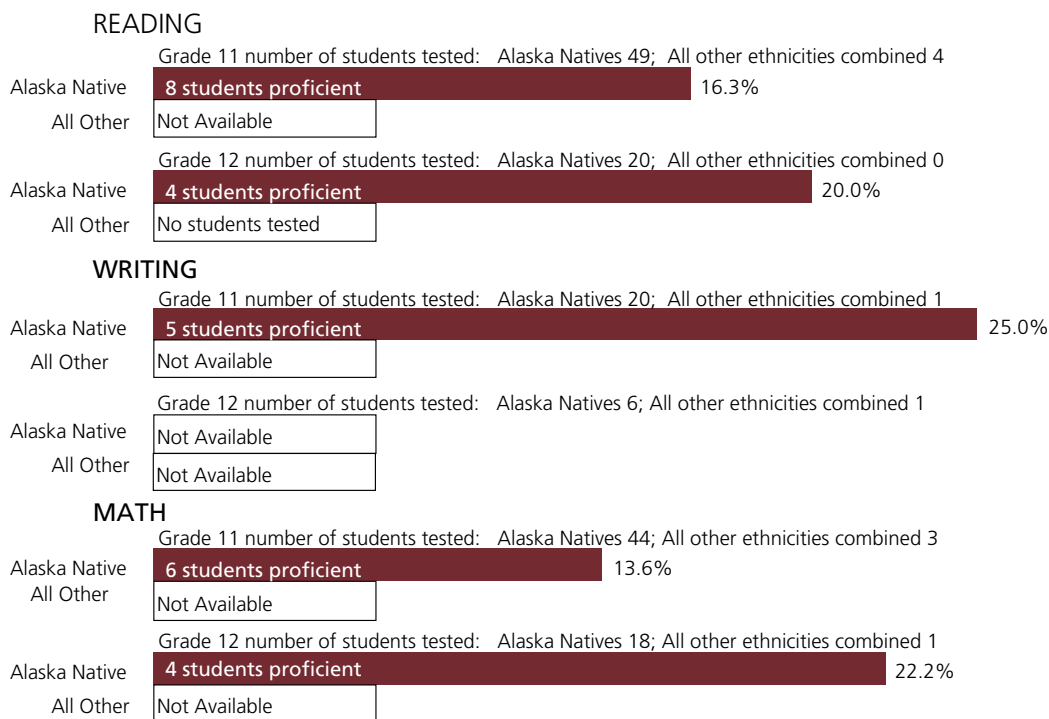

Source: Alaska Department of Education and Early Development.

Note: Proficiency is based on a percent of students who took the test and is not based on enrollment.

Bristol Bay region High School Graduation Qualifying Examination results were compiled for the ethnicities and schools that had available data. Some re-testing results for students in the 11th and 12th grades were not available because some data may have revealed an individual student's performance or there were no non-Native students tested.

Figure 31

for Grade 11 and 12 Re-Testers, by Ethnicity  
2003 – 2004 School Year

Source: Alaska Department of Education and Early Development.

Note: Proficiency is based on a percent of students who took the test and is not based on enrollment.

## High School Graduation Rates

In the 2003-2004 school year, the Bristol Bay region graduation rate for all students was 60.8 percent. Alaska Native students graduated at a rate of 60.2 percent, compared to 63.6 percent for all other ethnicities combined.

A graduate is defined as a student who has received a regular diploma from a state- or district-approved education program, as evidenced by receipt of a secondary school diploma from school authorities. Any student who receives a diploma under a waiver from the competency examination required in AS 14.03.075 (a), as specified by the state board, is considered to be a graduate. This does not include an individual who receives a Certificate of Achievement.

The No Child Left Behind Act requires the Alaska Department of Education and Early Development to adopt a cohort method for determining high school graduation rates. Beginning in the 2002-2003 school year, the Department switched to a new cohort method to measure the relative percent of students that graduate from high school in four years. For the 2003-2004 school year graduation rate indicator, the cohort includes all students starting high school (Grade 9) in the 2000-2001 school year through their graduation scheduled four years later in the 2003-2004 school year.

The graduation rate formula used by the Alaska Department of Education and Early Development is:

$$\frac{\text{Number of Graduates (2003-2004)}}{\text{Number of Graduates (2003-2004)} + \text{Number of Continuing 12th Grade Students (2003-2004)} + \text{Number of 12th Grade Drop-outs (2003-2004)} + \text{Number of 11th Grade Drop-outs (2002-2003)} + \text{Number of 10th Grade Drop-outs (2001-2002)} + \text{Number of 9th Grade Drop-outs (2000-2001)}}$$

It is important to note there are some limitations with this new methodology. For instance, a student that graduated in five years, rather than four years, would be counted in the next cohort of students. A student that graduates in three years, instead of four, would be counted in the prior cohort. Additionally, in the 2000-2001 and 2001-2002 school years, student-level information was submitted with anonymous information that could not be linked directly with specific students. The Department had no way to check for duplication or to see that the ethnic codes are valid for those two years.

Table 61

Notes: \* Continuing 12th Grade students include students who did not graduate in the 12th year but remained enrolled in school to complete course work toward graduation in the following year(s).

\*\* Includes a sum of total student drop-outs from the 2000-2001, 2001-2002, 2002-2003, 2003-2004 school years.

\*\*\* Graduation rates are calculated using the following formula:  $\text{Number of Graduates} \div (\text{Number of Graduates} + \text{Number of Continuing Students} + \text{Number of Drop-outs (2000/2001 to 2003/2004)})$ .

## Drop-Out Rates

A drop-out is defined as a student who was enrolled in the school at some time during the school year and left the school at some time during that same school year.

Bristol Bay region drop-out rates are displayed in the following table for the 2003–2004 school year. Reporting, calculating, and interpreting drop-out rates are subject to error and should be viewed with some caution, when reported at the region and school district levels. Drop-out rates do not directly correspond to high school graduation rates because graduation rates use a cohort method of calculation (over the past four years), rather than a single-year event, and do not include 7th and 8th grades.

The drop-out rate for Alaska Native students in the Bristol Bay region for grades 7 through 12 was 7.3 percent for the 2003-2004 school year. This compares to all other students in the Bristol Bay region who dropped out at a rate of 1.0 percent.

When compared to 2001-2002 school year drop-out figures, it appears that drop-outs have increased for the region.

Table 62  
 Bristol Bay Region  
 Drop-Out Rates for Grades 7 through 12 by School and Ethnicity  
 2001-2002 and 2003 – 2004 School Year
